## Career Highlights

**-99.8%**

Async processing time  
Page Group

**-97.6%**

Frontend response time  
Delosi

**90%+**

Query performance gain  
Globant

**60x**

DB & app speedup  
CSTI Corp

## Profile

Senior Full Stack Engineer with 10+ years building production systems embedded directly in US-based engineering teams. Consistent track record of measurable impact: 99.8% processing time reductions, 60x performance gains, and 90%+ query optimizations shipped across enterprise, SaaS, and e-commerce environments. Specializes in .NET, React, and Azure across the full delivery lifecycle — from API design to CI/CD. Has delivered in production for clients in Miami, Austin, and Nashville with zero onboarding overhead, operating on US time zones from Lima.

## Technical Skills

**Backend:** C#, .NET 6/7/8, .NET Framework, ASP.NET Core, REST APIs, gRPC, Microservices, WCF, Windows Services

**Frontend:** React, Next.js, TypeScript, JavaScript, Vue.js, Razor Pages

**Cloud & DevOps:** Azure, Azure Functions, Azure DevOps, CI/CD, Docker, AWS

**Data:** SQL Server, Azure SQL, Cosmos DB, PostgreSQL, MongoDB, Oracle Database

**Integration & Messaging:** Kong API Gateway, RabbitMQ, Salesforce CRM

**Testing & Tools:** xUnit, Selenium, EF Core, React Query, Zustand, Git

## Experience

### Full Stack Engineer — Kenility, Miami (US Client)

Contract • Oct 2024 – Present

- Engineered event-driven purchase workflows using Azure Functions and async processing, eliminating synchronous bottlenecks on a live US e-commerce platform.
- Built REST APIs and backend services connecting payment, inventory, and order management systems across a multi-system e-commerce architecture.
- Delivered full-stack features spanning ASP.NET Core MVC, Razor Pages, and Next.js — covering API design through TypeScript UI — within an agile delivery cadence.

C#, .NET, ASP.NET Core MVC, Razor Pages, Next.js, TypeScript, Azure Functions, Azure SQL, Azure DevOps, CI/CD

### Full Stack Engineer — Developers.net, Austin (US Client)

Freelance, Part-time • Jul 2025 – Mar 2026

- Led end-to-end migration from a legacy API Gateway to Kong, implementing custom routes, plugins, and security policies — centralizing service governance across a distributed system.
- Designed REST APIs and gRPC services consumed by multiple microservices, enabling typed, low-latency cross-service communication.
- Containerized services with Docker and validated API contracts with xUnit, improving deployment consistency and test coverage.

C#, .NET, ASP.NET Core, gRPC, Kong API Gateway, Docker, Azure Cosmos DB, xUnit

### Full Stack Engineer — Acklen Avenue, Nashville (US Client)

Contract • Jan 2024 – Oct 2024

- Accelerated frontend performance through client-side caching, local storage optimization, and targeted database indexing on a production SaaS platform.
- Built Azure Functions automations and third-party web service integrations that replaced manual business workflows, reducing operational overhead.

— Shipped features across the full .NET + React + Azure stack on an active production platform without degrading system reliability.

C#, .NET, ASP.NET Core, React, TypeScript, Azure Functions, SQL Server, EF Core, Azure Blob Storage, Azure CDN, Cosmos DB, Azure DevOps

## **Full Stack Engineer — Globant, Lima**

Full-time • Jan 2021 — Dec 2023

— Designed a configurable recursive algorithm for hierarchical personnel management that cut query execution time by 90%+, replacing an approach that failed beyond three organizational levels.

— Delivered database synchronization and integration across distributed services, resolving data consistency issues and reducing technical debt on a platform managing thousands of employees.

— Enhanced key modules of a large-scale HR platform across the full .NET + React + SQL Server stack within a structured Scrum delivery model.

C#, .NET, React, SQL Server, TypeScript, Node.js, Express.js, RabbitMQ, Azure DevOps

## **Full Stack Engineer — Page Group, Lima**

Full-time • Apr 2019 — Dec 2020

— Redesigned the async data processing pipeline, cutting execution time 99.8% — from 5 minutes to 0.7 seconds — enabling near-real-time processing of sales and payment data.

— Integrated Salesforce CRM with internal sales systems, automating opportunity, quotation, and payment workflows and eliminating manual data reconciliation.

C#, .NET, React, TypeScript, SQL Server, Oracle Database, Salesforce CRM

## **Full Stack Engineer — Experis Peru / Delosi, Lima**

Full-time • Jun 2018 — Mar 2019

— Rebuilt the frontend rendering pipeline for Delosi's enterprise systems, reducing response time 97.6% — from 30 seconds to 0.8 seconds — improving daily operations for hundreds of internal users.

— Delivered backend integrations and system enhancements using .NET, WCF, and Windows Services, modernizing legacy enterprise systems without service interruptions.

C#, .NET, ASP.NET MVC, Web API, WCF, WPF, Vue.js, SQL Server, Oracle Database

## **.NET Developer — CSTI Corp, Callao**

Full-time • Mar 2016 — Jun 2018

— Optimized database queries and application logic for a major port operations client, achieving a 60x performance gain — reducing critical processing from 5 minutes to under 5 seconds.

— Delivered system enhancements and backend integrations across ASP.NET MVC, WebForms, and WCF services for a high-availability port management system.

C#, .NET, ASP.NET MVC, WebForms, WCF, SQL Server, REST APIs, Windows Services

## Education

### Informatics Engineering

Pontificia Universidad Católica del Perú · 2007 – 2012

## Certifications

Azure AZ-900 – Udemy (2025)

.NET 8/9 – Udemy (2024)

## Languages

English – B2 Conversational (daily collaboration with US-based teams)

Spanish – Native
